

## XRP for Exchanges

Ripple is a payments network built on blockchain that provides one, frictionless experience to send money globally. Unlike existing siloed networks, Ripple powers payments across networks with unmatched global reach for real-time payments at the lowest cost.

XRP is a digital asset that can be used on the Ripple network to lower liquidity costs while minimizing settlement risk and delays. Using XRP, bank and non-bank payment providers can source on-demand liquidity from digital asset exchanges to process cross-border payments.

## Benefits for Exchanges

### **NEW VOLUME**

XRP's role as a digital asset for global payments enables exchanges to access volume from rapidly growing cross-border payment flows.

### **VOLUME STABILITY**

Payment flows through XRP enable a consistent, less volatile volume for exchanges and the associated market participants.

### **FASTER SETTLEMENT**

XRP settles over 500x faster than bitcoin and ether, which allows for almost instant inter-exchange transfers for trading and payments.

## Why XRP

### STABLE

Over **29 million ledger** closes since inception with no network downtime in 2016.

### SCALABLE

Global throughput capacity of over **50,000 transactions<sup>1</sup>** per second.

### INSTITUTIONAL-GRADE

XRP benefits from Ripple's proactive regulatory outreach and penetration into some of the largest commercial banks.

### PREFERRED

XRP's technical superiority makes it a preferred settlement asset for payment providers.

### ROBUST

Open-source code with full-time engineers actively developing and maintaining the XRP Ledger.

### DECENTRALIZED

Over **25 global validators** operated by institutions like MIT, Microsoft, AWS, Bahnhof and CGI.

## Support

The Ripple Integration Team is equipped to provide enterprise-grade support to integrate XRP into your exchange.

## Getting Started

Exchanges have two choices for getting started with an XRP integration:

1

**BitGo**<sup>™</sup>

Integrate with BitGo APIs at [bitgo.com/api](https://bitgo.com/api)

2

Integrate with Ripple APIs at [ripple.com/build/rippleapi](https://ripple.com/build/rippleapi)

Ripple provides global financial settlement solutions to ultimately enable the world to exchange value like it already exchanges information – giving rise to an Internet of Value (IoV). Ripple solutions lower the total cost of settlement by enabling banks to transact directly and with real-time certainty, optionally using the digital asset XRP to further reduce liquidity costs. Banks around the world are partnering with Ripple to improve their cross-border payment offerings, and to join its growing, global network of financial institutions and liquidity providers. Ripple is a venture-backed company with offices in San Francisco, New York, London, Sydney and Luxembourg.
