

Tapping the Power of RippleNet Cloud

The Future of Banking Is RippleNet Cloud

As the financial industry adjusts to a digital-first world, cloud technology solutions are playing an increasingly critical role—enabling instant connectivity between financial service providers and their customers, on a global scale. Banks and financial institutions are relying more heavily on cloud technology to meet rapidly evolving customer demands by adjusting quickly in an unpredictable and changing environment.

By leveraging Ripple’s cloud technology, customers increase efficiency and are maximizing their competitive advantage with faster speed of innovation and time to market—while lowering total cost of ownership.

Contact Us

RippleNet Cloud allows banks and financial institutions to maximize their business benefits with minimal effort and more flexibility.

RippleNet Cloud enables the ability to send and receive payments with one integration amongst all customers on RippleNet, meaning less friction and standardization for scaling purposes.

Easy Connection: Customers can go live on RippleNet five days faster and without the need for hardware requisition or staffing up to get started.

Faster Implementation and Access to New Features: Customers experience faster implementation and access to the latest features. They can also more quickly take advantage of network-wide improvements and third-party services.

Scalability: With one API set for all of your RippleNet connections, Cloud customers will find it’s faster and cheaper to maintain and make new connections—lowering total cost of ownership.

“
Migrating our payment infrastructure to RippleNet Cloud allows us to provide our customers with a best-in-class experience.

Customers can now enjoy more transparency and easier navigation for both submitting payments and trading. RippleNet also allows us access to global partners, offering a standardized solution, and ensuring the integration and onboarding processes are seamless.

— Jacques Zylbergeld, FX Superintendent at Banco Rendimento
